## PETITION TO ADD A SECOND MAJOR

## SECOND MAJOR POLICY AND INFORMATION

Second majors (exclusive of some language second majors) are rare and must be approved by the college advisement center supervisors involved and the dean of the college responsible for the primary major. The second major proposal and approval process requires an evaluation of all University Core and major requirements and a time-to-graduation analysis. Petitions for a double major must be submitted prior to earning 75 BYU hours (excluding language exam credits). College advisement centers are prepared to assist interested students in the petition process. Courses used to satisfy the requirements of a student's major can also be used to satisfy the requirements of an approved second major, unless not permitted by the requirements of the proposed second major. Students who graduate with a second major only receive one degree (the one associated with the primary major) and one diploma. Only the primary major will be listed on the diploma. A proposal delaying graduation will seldom be approved because of the additional university and church resources that will be required.

To submit a request, 1) write a thorough explanation of why the second major will better prepare you for graduate school or employment; 2) using the major with the most hours completed, fill out the Comparative Graduation Plan accompanying this form. The supervisors of the CACs responsible for your proposed second major and your primary major will review the plan. If the supervisors approve the plan, it will be reviewed by the dean of the primary major for final approval. It is your responsibility to be aware of the consequences of lengthening the undergraduate experience, which may include CAC holds or discontinuance of financial aid.

I have read, understand, and agree to the policy and information
above.
